github.com/devmatt000

PROFESSIONAL SUMMARY

Result-driven AI/ML Engineer with 6+ years of experience building, training, and deploying intelligent systems at scale. Expert in deep learning, natural language processing, and predictive modeling, with a proven ability to take models from prototype to production. Strong background in MLOps, cloud deployment, and full-stack integration, combining data science rigor with software engineering excellence.

PROFESSIONAL EXPERIENCE

Senior AI/ML Engineer, Luminaa Labs

04/2023 - Present

Remote

- Architected and deployed Al-driven real estate forecasting models achieving 92% predictive accuracy on 2-year home value projections.
- Built LLM-powered property insights engine using LangChain + GPT- for natural language guerying.
- Designed a MLOps pipeline (AWS SageMaker + MLflow + FastAPI) reducing model update time from 3 days to 6 hours.
- Managed data strategy for 100M+ property records using Spark and Redshift.
- Mentored junior ML engineers and established CI/CD best practices.

Machine Learning Engineer, Nova Intelligence

06/2021 - 03/2023

Remote

- Developed text summarization and entity extraction models using BERT and T5 for automated reporting.
- Trained transformer models for sentiment and trend analysis with 89% F1
- Deployed scalable ML APIs via Docker + Kubernetes, handling 1M+ monthly requests.
- Created real-time inference services with model versioning using MLflow.

Al Engineer, DataForge Analytics

- Built fraud detection models (Random Forest, CatBoost) with 95% recall on imbalanced datasets.

- Automated feature pipelines and model retraining using Airflow and AWS Lambda.
- Implemented SHAP and LIME explainability dashboards for internal audits.

06/2019 - 05/2021 New York, NY - Collaborated with software teams to integrate AI models into SaaS applications.

EDUCATION

B.S. in Artificial Intelligence, New York University, New York

09/2015 – 05/2019 New York, NY

CERTIFICATIONS

AWS Certified Machine Learning - Specialty • TensorFlow Developer Certificate • Deep Learning Specialization - Coursera (Andrew Ng)

KEY PROJECTS

Al-Powered Content Automation, Multi-modal Al pipeline generating text, images, and videos for social media using GPT-4 + DALL-E + Whisper APIs.

Conversational Property Assistant (LLM), Fine-tuned open-source LLM (Mistral 7B) on structured real estate listings with LangChain + Pinecone for RAG.

Predictive Maintenance for IoT Systems, Hybrid LSTM + Prophet model predicting equipment failures 48 hours ahead, cutting downtime by 30%.

CORE COMPETENCIES

Machine Learning & Al

Supervised/Unsupervised Learning, NLP, Computer Vision, Time-Series Forecasting, LLM Fine-Tuning, Reinforcement Learning

Software Engineering

React, Node.js, Flask, GraphQL, Agile, Microservices Architecture

Programming & Data

Python, SQL, Pandas, Spark, NumPy, REST APIs, MongoDB, Postgres

MLOps & Deployment

FastAPI, Docker, Kubernetes, Airflow, AWS SageMaker, GCP Vertex AI, GitHub Actions, CI/CD

Frameworks & Tools

PyTorch, TensorFlow, scikit-learn, Hugging Face, LangChain, OpenAl API, MLflow, ONNX
